We believe the values and skills learned early on are vital building blocks for life. When our young people feel safe and secure they make smarter life choices in the future. They begin to explore unique talents and interests, and grow into independent, self-confident, inquisitive and enthusiastic learners. This makes for confident kids today and contributing and engaged adults tomorrow.

Creative Curriculum®

All child care education follow this nationally-recognized framework rooted in educational philosophy and theory as well as in practice. The Curriculum is composed of six core learning areas and takes into account individual interests, how each child personally develops and the learning environment.

Our infant through full-day kindergarten programs at our Westfield locations are accredited by the National Association for the Education of Young Children. To learn more, visit our website or naeyc.org.

EARLY LEARNING

These programs strengthen families and boost youth development by offering infants, toddlers, preschoolers, and their families a safe and healthy place to learn foundational skills, develop relationships and build self-reliance through character development and a structured curriculum.

Children need to have time to play, make choices, problem solve and have fun. With so many demands on today's families, the Y recognizes that our parents, guardians and caregivers need a reliable high-quality program in which they can be confident that their child is realizing their full potential. And, children need an environment that responds to individual needs and development while maintaining a safe and healthy atmosphere. Our programs are led by experienced and caring staff and we encourage parent involvement.
